Abstract: ENERGY STAR is a voluntary program developed in collaboration with industry to create a self-sustaining market for energy efficient products. The center piece of the program is the ENERGY STAR label, a registered certification label that helps consumers identify products that save energy, save money, and help protect the environment without sacrificing quality or performance.

EPA partners with retailers, energy efficiency program sponsors (EEPS), and product brand owners who wish to use the ENERGY STAR label to differentiate products as more energy efficient. Retailers, EEPS, and product brand owners sign and submit a Partnership Application (PA) with EPA to become a partner, indicating that they voluntarily agree to fulfill the relevant program requirements referenced in the Partnership Agreement Form and Participation Form.

Prior to labeling a product as ENERGY STAR, partners have eligible products tested in an EPA-recognized laboratory and certified by an EPA-recognized third-party certification body (CB). To minimize the burden on partners, EPA maintains an automated data exchange with CBs. The CBs share information with EPA on products they review from EPA-recognized laboratories during the certification process. The XML-based data exchange allows the CBs to automatically transmit information on certified products to EPA from their database via web services. This automated system eliminates the need for paper submissions.

The certification process also includes requirements for CBs to report to EPA products that were reviewed, but not eligible for certification, as well as to conduct post-market verification testing of a sampling of ENERGY STAR certified products. CBs complete a minimum amount of verification testing and share information with EPA on products verified twice a year. CBs report to EPA any post-market test data indicating a product may no longer meet the program requirements. While most product-related information is provided by CBs, partners are asked to submit to EPA annual unit shipment data for their ENERGY STAR certified products.

Finally, partners that wish to receive recognition for their efforts in ENERGY STAR may submit an application for the Partner of the Year Award. Partners that have ENERGY STAR certified central air conditioners, air-source heat pumps, furnaces, geothermal heat pumps, and windows that meet the ENERGY STAR Most Efficient criteria may submit an application to gain ENERGY STAR Most Efficient recognition.
